

# MedXpert

Elevate Your Operations and Clinical Excellence with Our Integrated Digital Solution and Human expertise, All in One Subscription Package

MedXpert is the only tech enabled services that can manage inventory for both open and closed area with included clinical expert. Sustaining optimal practices require a significant investment of time and resources over the years. With MedXpert, evaluate and enhance your practices annually.

#### Key benefits of MedXpert

## Take command and access your ADC fleet inventory from anywhere

**Quality Oversight:** Grant visibility to all members from any location within your facility.

**Dashboard Customization:** Configure your personalized dashboard view and receive alerts for practice deviations.

**Swift Inventory Optimization:** Take prompt stock optimization actions by directly adjusting your par level through MedXpert.

#### Elevated traceability for your narcotics

**Traceability:** Achieve a fully digital audit trail - capturing the What, Who, When, and Where of each Controlled Drug transaction.

**Easier investigation:** Convenient access to usage, returns, and discrepancies

Replace traditional CD registers with a fully digital alternative: Customisable and exportable hospital-wide.

### Receive two annual consultations with clinical consultant

**Crafting narratives from data:** Assisting in comprehending your data and essential practices.

**Quantify for optimisation:** Establishing your baseline annually and identifying enhancements and return on investment opportunities

**Prioritise what matters to you:** Delving into excess stock, stockouts, expired medications, and Controlled Drug dispensing.

#### DATA INTELLIGENCE

Manages inventory from Omnicell ADC XT cabinets or handheld devices for hospital wards without ADC
